

## HPS Client Lecture Programme 2017

Welcome to HPS Pharmacies' Client Lecture Programme for 2017. HPS Pharmacies view the annual lecture program as an integral part of the professional services provided to our sites and we value the feedback provided in relation to this service.

This year in response to the needs of our clients, we have again decided to allow each individual site the ability to select their own lecture programme. As usual, HPS Pharmacies will be developing new lectures to be available at the beginning of each month and in order to reflect our client base, some will be more specific to certain sectors of the industry. All new topics are detailed below; however if there is a particular lecture which you feel is not relevant for your site, you have the ability to choose another lecture from our library (refer to *optional lectures* list below).

Your clinical pharmacist will contact you in relation to developing your own personalised lecture programme for 2017. If there is a topic that you are particularly interested in that is not included in our library, please liaise with your clinical pharmacist and they will do their best to accommodate your need. We hope that you find this program both rewarding and educational and we look forward to working with you all over the next 12 months.

## New Lectures 2017

Available from:

1<sup>st</sup> January

- Delirium – Prevention and Management

1<sup>st</sup> February

- Allergy and Anaphylaxis

1<sup>st</sup> March
